ISSUE No. 78

MARCH 2010

DON'T BE A STATISTIC INSTALL REVERSING CAMERAS

These Camera systems have been proven in the Western Australian Wheatbelt over the past 4 years for optimum field performance.

They have proven to be tough, water and dust proof, shock proof and being infrared, have excellent night vision.

They will provide a more efficient and safer working environment.

Trucking

- Loading grain trailers at harvest, accurately. No climbing up and down to check load fill.
- Increased rear vision when reversing into sheds and onto augers etc.
- Unloading (especially wet sand and gravel) can be checked from the cab.

Seeding.

- Seed and super bin, check level without climbing up.
- In air-seeder box lid, the operator can see the exact time grain or fertiliser runs out.
- In tow between air seeders behind tank so operator has vision of middle of bar.
- Also very applicable for hay baler's and super spreaders, blocked belt etc.

Harvesting

- Constant visual check of grain tank, prevent spillage from overfill and turning at end of run.
- Constant vision of chaff cart, or hay baler.
- End of auger in both header and chaser bin.
- Inside chaser bin so operator can position for best fill whilst still looking forward.
- See behind header when unloading auger is folded down.

Farm vehicles, cars and all 4 wheel drives

- Reversing onto trailers.
- See behind in blind spot (especially applicable to high back 4 wheel drives)
- Horse Floats, constant vision of horses or any animal/load.

HID LIGHTING SYSTEMS

Tests show increased field of vision, over double distance and better colour illumination, from using 10 lamps in place of the original 15.

Alternator load reduced by up to 70%.

Features:

- A wide stainless steel mounting base with two rubber shock absorbing cushions
- A Xenon HID system integrated in the lamp base using robust H1 35 Watt globe producing 4300K white light with a low power requirement
- A compact size measuring 235mm high, 160mm wide and 180mm high designed for Australian machinery
- Easy to install as once piece unit
